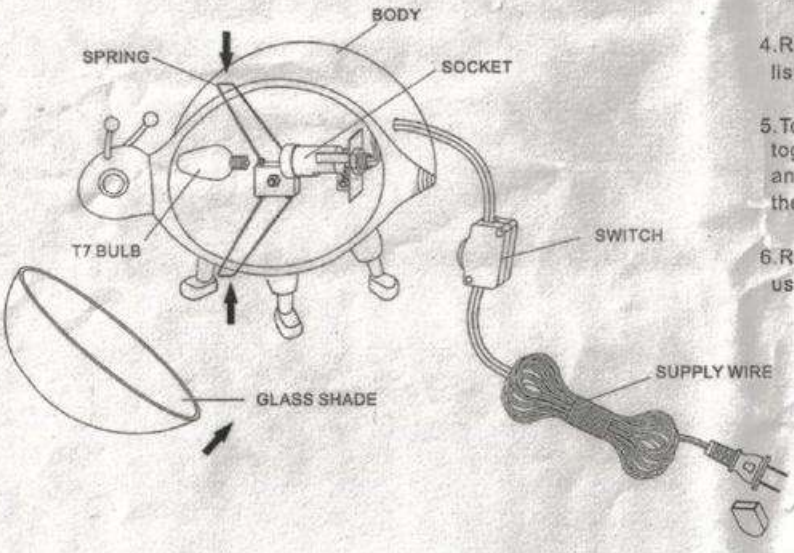
FIGURE1



ASSEMBLY INSTRUCTIONS

1. Your Lady Bug lamp should be ready to set up right out of the box. The bulb is installed at the factory. Keep these instructions for re-lamping in the future.

2. Before re-lampling, **DISCONNECT LAMP FROM ELECTRICAL SOURCE TO AVOID POSSIBLE ELECTRIC SHOCK!**

3. Grasp the BODY with one hand and the GLASS SHADE with the other hand and pull the two apart. A spring clip with allow the shade to be separated from the base.

4. Remove the burned out lamp and install a lamp with the correct wattage listed on the lamp warning label.

5. To re-install the glass shade, push up both ends of the spring clips together and slip the inside metal lip of the shade between the spring and body on each side. Place the glass shade down slowly, allowing the spring clips to pull the glass shade back into place.

6. Re-install plug back into the power source, you lamp is ready to be used again.
